SOLT Wireless Paging System

**Advanced Technological Network Solution Systems
to the Hospitality, Healthcare, Industrial, Manufacturing, Construction,
Financial, Security and Telco Industries.**

SOLT Co., Ltd.

Wireless Data Transmitter
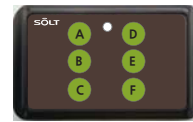

SB5−10WH   SB5−10BK   SB5−10BR

1. Simplify data transmitter (One Touch System)
2. FM Broadband frequency with strong and stable data transfer.
3. LED light for easy visual.
4. Size : 58Ø×12,6H (mm)
5. Powered : 3V CR2032 Coin Battery Operated
   (Battery Lifespan : more than 50K times)
6. Distance for Data Transfer : ∼ 150m

Wireless Data Transmitter

SB6−20   SB6−30   SB6−60

1. Simplify data transmitter (2,3,4,6 Touch System)
2. FM Broadband frequency with strong and stable data transfer.
3. LED light for easy visual.
4. Size : 98W X 54L X 15H (mm)
5. Powered : 3V CR2032 Coin Battery Operated
   (Battery Lifespan : more than 50K times)
6. Distance for Data Transfer : ∼ 150m

SOLT Server

SM5−33R   SM5−61R   SR5−MIR
SM5−33T   SM5−61T   SR5−MIT

1. More powerful Sending and Receiveing of data device
   in the existing market.
2. FM Broadband frequency with strong and stable data transfer.
3. Easy installation
4. Quiet environment with vibrate activation
5. 3 different data information could be verified from the server.
6. Size (SM5−xxx) : 288W × 133L X 40H (mm)
   Size (SM5−xxx) : 46W × 90L X 32H (mm)
7. Powered : AC 220V / DC12V Adapter
8. Frequency Area : Surrounding Frequency (360˚)
9. Distance for Data Transmission : ∼ 200m

Data Wireless Pager

SP5−100   SP5−200

1. Immediate data receiving capabilities.
2. FM Broadband frequency with strong and stable data receiving capabilities.
3. Receiving Function with Lighting / Tones / Vibration (Optional)
4. Vibration capabilities for busy environment.
5. Wrist or Clip function for easy handling
6. 8 received data memory with auto delete function
7. Size : 56W×42L×16H (mm)
8. Powered : Rechargeable Li−polymer 600mAh DC 3,7V Battery operated
9. Distance from server : ∼ 200m

Multi Data Transmission System

Multi Data Transmission Program

SR5−MTP

1.
2. FM Broadband frequency with strong and stable data transfer.
3. SR5−MTP communicate with PC by RS−232C
4. Numeric data only
5. Data could be transmitted to one/group/multi group at any one time.
6. Size : 146W×90L×32H (mm)
7. Powered : AC 220V / DC12V Adapter
8. Frequency Area : Surrounding Frequency (360˚)
9. Distance : ∼ 200m

Relay Transmitter

SR5−BR   SR5−PR

1. Data Transmitting Distance increased.
2. SR5−BR and SR5−PR Relay Transmitter could handle 500
   data transmitter
3. Can be set SR5−BR(Bell Relay) or SR5−PR(Pager Relay)
   depending on the installation environment
4. Size : 146W×90L×32H (mm)
5. Powered : AC 220V / DC12V Adapter
6. Frequency Area : Surrounding Frequency (360˚)
7. Distance : ∼ 200m

SOLT - WIRELESS PAGING SYSTEM FOR RESTAURANTS

Existing Restaurant's Challenging Problems

1. Given an average restaurant's business every waiter is busy and most of the time unproductive and not able to fully serviced all the customers efficiently.

2. Too many waiters attending and servicing just one table for various requests.

3. In many instances waiter are eager to take orders while customers are not ready and many time feel very uncomfortable and nervous.

4. Pick up of food delays and food may be served cold leading to unecessary customers complaints.

5. At times / whenever customers seeks waiter's service they have to wave their hand / stand up or move to the service counter when it is so difficult to get service and attend to their requests.

6. Because of the above 5 problematic service issues encountered by many restaurants in view of current economic and shortrage of experienced service staff, potential sales loss / high staffing costs / and less efficient and unproductive affecting reputation of restaurant.

Solutions by Using SOLT − Wireless Paging System

1. Every tabel is incharged by a waiter and every customer is serviced and attended to almost immediately.

2. Systematic usage of waiting staff for immediate and attentive service customers requests.

3. Service staff will be efficient and productive and able to handle other tasks while awaiting for customers readiness to order within a few second notice.

4. In the kitchen with the call button food is picked up promptly and simultaneously served to the customers at its correct temp.

5. Instant reaction by waiter to attend immediately to customers.

6. With SOLT − Wireless Paging System restaurant only require minimal staffing / attentive and efficient personalized services to meet all customers requests promptly and upgrade restaurant reputation / reduce staffing costs / sales increases with excellence in restaurant quality of services.

SOLT - WIRELESS PAGING SYSTEM FOR HOTELS

Existing Hotel's Challenging Problem

1. Hotel's Restaurants - refer to outline for restaurants. Though the level and standards are higher prevailing challenging problems are always there.

2. Hotel's Mini Bars - This department has always been problematic to many hotels resulting in huge losses due to pilferages etc.

3. Hotel's Swimming Pool and Massage Services - Inability to meet and attend to customers request and services promptly.

4. Hotel's Banqueting - Being one of the major revenue earner encountered almost daily inability to meet all customers requests promptly / unattentive services - many a times / high staffing costs / lack of overall strategic operational management of control of manpower staffing etc.

5. Hotel's Parking Services - Inadequate quality of personalized services and delays and long waiting period to get to the car.

Solutions by Using SOLT – Wireless Paging System

1. SOLT - Wireless Paging System will greatly enhanced the higher standards of services in hotel's restaurants to new heights of service excellence.

2. This system will improve and upgrade communications levels and responses between hotel depts and guests and able to reduce losses significantly.

3. Personalised level of varied services / service excellence thru immediate attention to customers requests and overall increase in sales.

4. Person in charge can attend to every banquet room & customer requests and services / efficient management of banquet staffing reducing complaints and with efficient level of services to increase higher level of sales and overall guests satisfaction.

5. No unecessary delay with prompt delivery of car to customers and more time to provide additional services.

SOLT - WIRELESS PAGING SYSTEM FOR HOSPITALS

Existing Hospital's Challenging Problems

1. Present Hospital's Wired - Linked System - Installation is time consuming / expensive / very costly after sales service and in consistent and unreliable.

2. Nurse Calling System - Nurse must provide 24 hours attention to monitor the equipment if not patient will be a dangerous situation.

3. Serious and critically sick patient must be looked after and watched over a 24 hours period.

4. Present light system do not alert the nurses effectively and any 'misses' will cause a very dangerous situation for the patient.

5. In an emergency room, any emergency alert by the surgeon etc. to seek assistance not attend to met may cause serious consequences to the patient.

6. Doctor Calling System - presently seeking them through handphone / intercom / pager or public address system may not be effective and efficient.

7. Missing new born baby and wherabouts of wandering patient etc.

Solutions by Using SOLT - Wireless Paging System

1. SOLT System's installation is simple and easy to install at any time, furthermore costs is low and almost maintainence free and after sales service is prompt and prices are very resonable.

2. Wherever the location of the nurse they can receive data and requests from patient through their alerting pager.

3. Nurses are able to receive auto data info and drastic changes will alert the nurses and doctors for urgent medical attention to the patient.

4. Mobile wireless paging system is extremely fast and effective.

5. We need the SOLT - Emergency foot button system to call outside emergency assistance.

6. Can immediately locate doctor through the wireless paging system.

7. Baby ID Sensor / or patient ID sensor to identify their location.

SOLT - WIRELESS PAGING SYSTEM FOR INDUSTRIAL SECTOR

A brief overview of existing other industrial sector's challenging problems and solutions by using SOLT – Wireless Paging System

Wireless Paging System is being able to contact the attending engineer quickly and economically. Normally Alerting siren and alarm lights are difficult to inform and alert the engineer directly.

Wireless Paging Wireless solution minimizes waiting period to rectify plant error thus maintaining and improving equipment care and also preventing chaotic situation through noisy and defeaning sounds of the alarm system.

While the conventional equipment is alerted with the siren and alarm lights, the wireless alarm system is automatically activating and transmitting the warning message to the engineer's pager almost instantenously.

SOLT – WIRELESS PAGING SYSTEM FOR OTHER INDUSTRY

A brief overview of existing other industry's challenging problems and solutions by using SOLT – Wireless Paging System

SPAs, Slimming Centers, KTV and Night Clubs

Individual VIP rooms are difficult to service and inability to provide adequate attention to customers' varied requests. Not able to provide decerning and topnotch level of personalised serviced.

SOLT – Wireless Paging System is efficient by ensuring management to meet customers needs and services immediately with additional professional touch and personalized approach.

Supermarkets and Hypermarkets

On a typical trading day cashier find difficulty to locate supervisor or security on issues of credit card / bar code / price verifications / change of monies and possible customer fraud or pilferages or trouble maker-customes etc.
Even customers do have problems to seek help to locate certain products or other related services.

With the SOLT Wireless Paging System, all respective management and security are instantly alerted and all emergency follow up are attended immediately. In the Hypermarket environment a wireless button is set up in each specialty food and beverage section where customers can seek immediate assistance to their variour queries. Hypermarket can further differentiate and position itself with the highest and unique level of personalized services and attention to all their customers.
