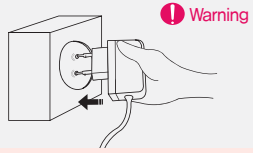
Important Safety Instructions

In order to prevent harm or injury to those using the equipment or to any other persons and/or property, please be sure to read the following safety instructions.

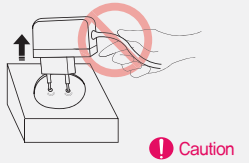
Warning This sign warns of possible death or serious injury to persons and/or property.

Caution This sign warns of possible damage or injury to persons and/or property.

Power precautions

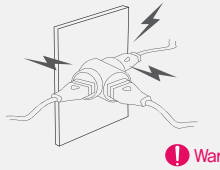


Make sure the power plug is correctly inserted in to the wall outlet.
[If the plug is inserted improperly, it may cause electric shock or generate heat resulting in fire.]

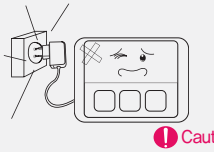


Never do anything that might cause damage to the cord or power plug.
[This may generate heat resulting in fire.]

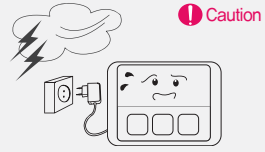
Do not connect or disconnect the power plug with wet hands.
[This may result in electric shock.]



Do not use multiple power plugs on one connector. [This may generate heat resulting in fire.]

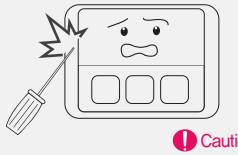


Unplug the power plug if the main unit is damaged. [It may cause electric shock or generate heat resulting in fire.Please contact service center.]

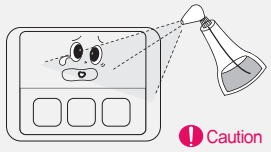


Unplug the power plug, in case of lightening or when unused for long periods of time. [It may cause electric shock or generate heat resulting in fire.]

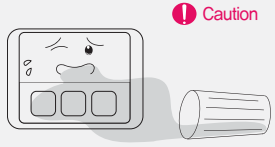
Use precautions



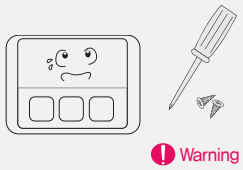
Do not harm or damage the unit with sharp object such as nail, pencil, or pen. [It will damage the surface of the unit and cause malfunction.]



Do not clean the unit with water, benzene, or paint thinner. [Damage to the insulation of electrical parts may cause malfunction.]



If foreign object enters the unit, please contact service center.
[This may cause damage to the internal parts.]



Do not disassemble or modify the unit. If repair of the unit is required, please contact the service center.

If the battery icon in the illustration above flashes, recharge for more than two hours before use.

Use the supplied adapter.
[Malfunctioning of supplied adapter during its use is not covered by manufactures' warranty.]

Charging adapter

※ Limited accessary warranty: Malfunctioning of supplied adapter during its use is not covered by manufactures' warranty.

※ Use only the supplied adapter to charge the unit.
Unlike other devices, a PC could not be used for charging due to USB port incompatibility.

Specification

Model	SP5-100 / SP5-200
Frequency(MHz)	433.0500 ~ 434.7900 , 447.8625 ~ 447.9875
Freq Stability	±5 ppm
Data Rate	1800 bps
Channel space	12.5 KHz
Modulation	FSK (±3KHz)
Sensitivity	-118dBm (at 12dB)
Power Supply	DC 3.7V Li-Polymer Battery (Rechargeable)
Dimension(mm)	56W × 42L × 16H
Battery Standby Time	Max 30 hours
Antenna	Helical (Internal)
